

# Chethana Kuppala

Columbia, SC (Open to Relocate) | ckuppala@email.sc.edu | LinkedIn

## SUMMARY

Business and Data Analyst with master's degrees in Business Analytics and Medical Informatics, skilled at turning multi-source data into decisions. Proven record building executive KPI dashboards, automating reporting pipelines, and translating stakeholder requirements into technical specifications across healthcare, academic, and sports-analytics settings. Proficient in SQL, Python, R, SAS, Tableau, Power BI, and Advanced Excel, with strengths in KPI tracking, trend and variance analysis, and root-cause analysis. Effective at presenting data-driven recommendations to leadership to improve operational efficiency and strategic outcomes.

## SKILLS

**Programming & Databases:** SQL, Python, R, SAS, Hadoop  
**BI & Visualization:** Tableau, Power BI, Power Query, Advanced Excel (PivotTables, Macros, Formulas, Solver)  
**Analytics & Reporting:** KPI tracking, dashboard development, trend & variance analysis, regression modeling, root-cause analysis, data validation, forecasting  
**Business Analysis:** Requirements gathering, process mapping, workflow analysis, documentation, UAT support, stakeholder collaboration  
**Tools & Domains:** Jira, Confluence, Visio, Microsoft Office Suite; Healthcare operations, clinical workflows, value-based care  
**Certifications:** SAS Certification

## EXPERIENCE

**Graduate Assistant – Data Analyst**, *Student Success Center, University of South Carolina* Aug 2025 – Present

- Built and maintained 4–5 executive-level KPI dashboards in Tableau and Excel, translating requirements gathered from 6 leadership stakeholders into data-driven insights for student support program decisions.
- Identified performance gaps and trends across multi-source operational datasets using SQL and Excel, conducting root-cause analysis on reporting discrepancies and improving data accuracy by 15%.
- Automated recurring reporting workflows, reducing manual data preparation by 10+ hours per month while strengthening data validation controls and operational efficiency.

**Graduate Research Assistant – Research Analyst**, *Arnold School of Public Health, USC* Jan 2025 – May 2025

- Built 3-year financial performance dashboards in Tableau supporting strategic forecasting and growth analysis, reducing reporting errors by 15% through standardized data validation and governance best practices.
- Automated 4–5 recurring financial data workflows using SQL and Excel, saving 10–20 hours per month and improving scalability across department operations.
- Produced 4–5 analytical reports identifying cost-efficiency and process optimization opportunities, driving a 40% efficiency gain through 3 implemented recommendations to leadership.

**Graduate Assistant (Analytics)**, *Molinaroli College of Engineering and Computing, USC* Jan 2025 – May 2025

- Analyzed healthcare financial and utilization datasets using SQL, SAS, and Python across 3 departments, identifying a 30% cost trend within a \$15K–\$20K budget that informed public health funding strategy.
- Conducted structured data reconciliation and validation ensuring accuracy and compliance of financial reporting outputs, reducing reporting risk across multiple data sources.
- Developed 3–4 executive-ready dashboards for 2 departments, cutting reporting time by 55% and enabling data-driven decisions for clinical and administrative leadership.

**Business Systems Analyst – Mobile Farmers Market**, *IIT Department, USC* Jan 2024 – May 2024

- Developed SQL-based data models supporting operational and financial reporting across integrated systems, reconciling and validating 50–70 data sources to meet program reporting and data quality standards.
- Redesigned 3–5 data workflows to enhance process automation, reducing reporting turnaround time by 25% across multiple integrated systems.
- Collaborated with 4 cross-functional stakeholders to align analytics outputs with funding objectives and 9+ operational KPIs, delivering insights that directly supported program decisions.

## PROJECTS

**Project Manager & Analytics Storyteller**, *USC Athletics – Fan & Ticketing Analytics* Aug 2025 – Present

- Analyzed 1M+ rows of ticket sales, attendance, and revenue data using SQL and Excel, identifying pricing trends, customer segmentation patterns, and revenue optimization opportunities across multiple sports programs.
- Built 7+ performance dashboards in Tableau and Excel applying regression and trend analysis to forecast ticket demand and support data-driven pricing strategy.
- Conducted variance analysis on revenue fluctuations across seasons and segments, delivering executive presentations to 2 stakeholder groups that informed pricing strategy and contributed to a 20% revenue impact.

## EDUCATION

**University of South Carolina** — M.S., Business Analytics Aug 2025 – May 2026  
*Study Abroad – Darla Moore School of Business, South Korea (Spring 2026)*

**University of South Carolina** — M.S., Medical Informatics Aug 2022 – May 2024  
**Osmania University** — B.S., Pharmacy Aug 2018 – Jul 2022
